The Science Citation Index Expanded

We are pleased to announce the inclusion of **Experimental and Clinical Transplantation** in Thomson Scientific's **Science Citation Index Expanded™**.

Experimental and Clinical Transplantation

The **Science Citation Index Expanded** provides access to current and retrospective bibliographic information, author abstracts, and cited references found in approximately 5,900 of the world's leading scholarly science and technical journals covering more than 150 disciplines. The **Science Citation Index Expanded** format is available through the **Web of Science®** and the online version and **SciSearch®**.

The **Web of Science** provides seamless access to current and retrospective multidisciplinary information from approximately 8,700 of the most prestigious, high impact research journals in the world. **Web of Science** also provides a unique search method, cited reference searching. With it, users can navigate forward, backward, and through the literature, searching all disciplines and time spans to uncover all the information relevant to their research. Users can also navigate to electronic full-text journal articles.
